The flat fee will be paid at the established rate for the level of the offense for which the defendant was originally charged by indictment or information, or for which the defendant entered a plea, whichever is higher. If a defendant is pleading to multiple cases on the same date, the flat fee will be paid on the voucher that generates the highest flat fee. The additional cases will be paid the flat fee for multiple cases established by this schedule.

The Flat Fee Schedule is based upon the amount of time typically expended by an attorney on a routine case that does not involve unique factual or legal issues. Although itemization is not required on a request for a payment of a flat fee, attorneys are still advised to maintain a detailed record involving the legal services provided. Attorneys are reminded that it is the Court's responsibility to insure that indigent Defendants are provided adequate legal representation as provided by law. In the event of a complaint is made against an appointed attorney regarding legal representation, the Courts will be requesting this type of information from the attorney.

In the event of exceptional circumstances, the Court may allow a fee in excess of the above stated Flat Fee amounts. However, the attorney must provide a detailed, itemized statement (as to date, time expended and service rendered) to justify a variance from the Flat Fee Schedule.
